SUMMARY

BTech Computer Science student with a strong interest in Artificial Intelligence, Machine Learning, and Quantum Computing. Built an AI-assisted hybrid quantum optimization solution for a real-world industry challenge using Python, Qiskit, and PennyLane through the WISER Global Quantum + AI Program. Actively developing skills in quantum algorithms, optimization, and enterprise decision-support systems

EXPERIENCE

Quantum Systems Engineer Intern

Blackbucks Education Pvt. Ltd

📅 06/2026 - 07/2026

8-week short-term internship conducted under Andhra Pradesh State Council of Higher Education (APSCHE) guidelines

- Completed structured training sessions, practical assignments, and project-based learning activities in quantum systems engineering

PROJECTS

Quantum Optimization for Distributed Order Management

🔗 github.com/SiramaAvinash/nestle-quantum-dom-wiser-2026

Nestlé Industry Challenge - Team project (3 members)

- Built an AI-assisted hybrid quantum optimization framework to assign customer orders to distribution centers under inventory, capacity, and cost constraints
- Formulated the distributed order management problem as a QUBO and implemented quantum optimization experiments in Qiskit and PennyLane alongside classical greedy/LP baselines
- Designed an end-to-end pipeline spanning data engineering, AI-based demand prediction, hybrid optimization, and an interactive Streamlit decision-support dashboard
- Collaborated in a 3-person team on a real-world Nestlé industry case study as part of a global quantum + AI program

EDUCATION

Bachelor of Technology (BTech), Computer Science

KKR & KSR Institute of Technology and Sciences, Vinjanampadu

SKILLS

Programming

Python SQL Git GitHub

AI & Machine Learning

Pandas NumPy Scikit-learn

Predictive Modeling

Feature Engineering

Quantum Computing

Qiskit PennyLane

QUBO Formulation

Quantum Optimization

Hybrid Quantum-Classical Optimization

Optimization

Classical Optimization (Greedy/LP)

Combinatorial Optimization

Tools & Platforms

Jupyter Notebook Streamlit

GitHub
